6 PLACING A PART ORDER 5

7 ABBREVIATION 6

1 PURPOSE AND IMPORTANT REQUEST

(1) This part list is intended for the maintenance of Mazak machine tools.
Use the part list to identify replacement parts when servicing your machine tools.

(2) For maintenance, observe the following items:

⚠ IMPORTANT REQUEST

- Before starting a checkup or repair, understand the contents of the OPERATING MANUAL and the MAINTENANCE MANUAL well.
  Especially it is dangerous to start working before thoroughly understanding the SAFETY PRECAUTIONS and the explanations of the intended work.
- In order to keep the machine specifications set at the time of delivery, use the replacement parts and expendable parts recommended by us without fail.
  We are not responsible for any physical injury and machine down caused by the failure of observance.

(3) The list is subject to change without notice due to improvements of machines.

(4) Refer to “6 PLACING A PART ORDER” for replacing a part or placing an order.

2 PART LIST OUTLINE

2-1 Types and Manual Numbers

Mazak part lists are classified into three types according to specifications:

(1) Standard: Lists parts of standard specifications.

(2) Optional: Lists parts of optional specifications and supplementary parts of standard specifications.

(3) Custom: Lists parts of custom specifications and supplementary parts of standard specifications.

You can identify the type of your part list by the manual number (consisting of 11 alphanumeric characters) printed above the serial number on the cover page. The type of document is represented by the fifth and sixth characters from the left of the document number, as shown below.

Manual number: XXXXOOXXXXE

- LA (Standard)
- LB (Optional)
- LC (Custom)

Notes on the use of part lists:

When units of the same specifications are covered in “optional” or “custom” part lists, the higher priority for use is assigned to the custom, optional, and standard types, in that order.

2-2 Composition of Book-Binding

Principally, standard part lists are issued alone. However, depending on the machine specifications or the particular issuing time of the publication, optional and custom parts lists may be bound in a standard part list look on two or more types of contents may be bound in different looks. In such a case, the multiple types of contents are separated by the respective covers or the respective tables of contents. Take notice of this when using combined-volume part lists. An example of a combined-volume part list is shown below.

Contents of an optional part list
Contents of a custom part list (1)
Contents of a custom part list (2)

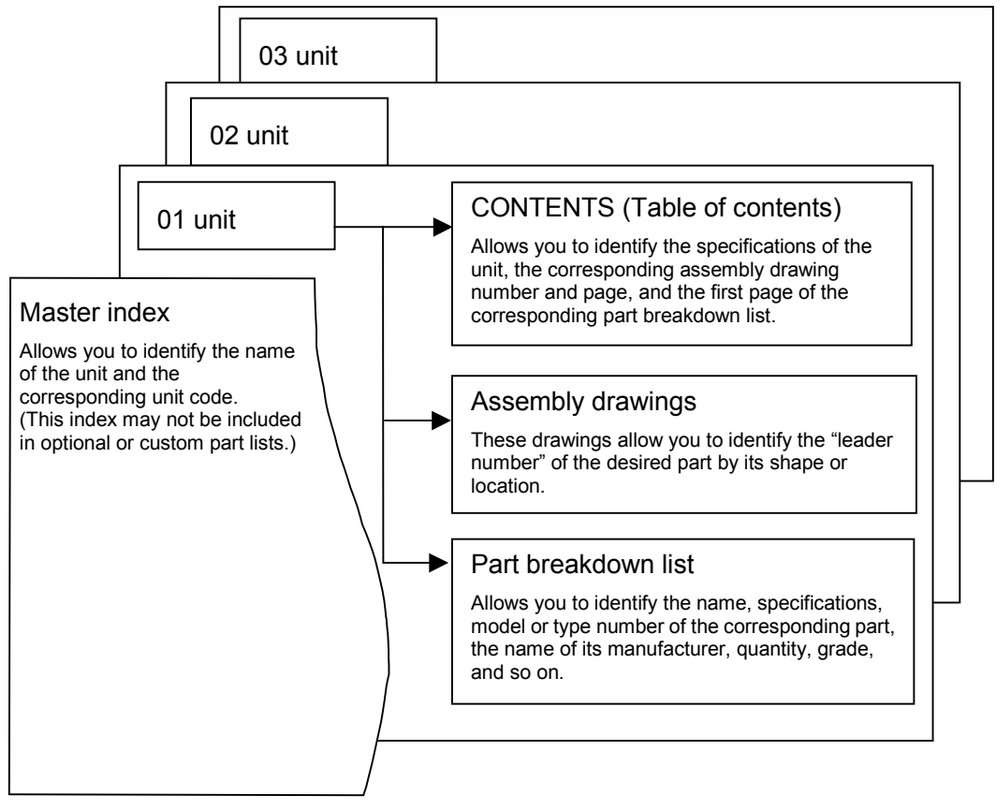
Separated by the cover or the table of contents.

2-3 Composition of Contents

At Yamazaki Mazak, the major units of part sets that constitute a machine tool are simply called “units”.

Each unit has an assigned specific unit code consisting of two numeric or alphabetic characters.

The contents of each part list are compiled for each unit in normal ascending order of the unit code, and units are covered in CONTENTS (table of contents), assembly drawings, and part breakdown lists, in that order.



3 HOW TO USE THE PART LIST

See items ①, ②, ③, and ④ below, in that order. (The example below relates to INTEGREX-200.)

① **Master index** Confirm the unit code of the unit including the desired part, and open CONTENTS ② of that unit.

MASTER INDEX

MODEL/MANUAL NO.: IG-200Y/200SY / H135LA0041E ← Manual numbers

U-NAME	UNIT	
HEAD 1	01	1/2
TURRET 1	15	1/2
SUB X DRIVE	24	1/2
X DRIVE 1	25	1/2
X DRIVE 2	26	1/2
Z DRIVE 1	30	1/2
B DRIVE	33	1/2
CARRIAGE 1	35	1/2
CARRIAGE 2	36	1/2
TAIL STOCK	37	1/2
SECOND SPINDLE	38	1/2
BED	40	1/2
SUB COVER	46	2/2

← Separate-volume number
(given only for a separate-volume part list)
This number is given on the cover of each separate volume constituting the part list.
Use this number to find the part list that covers the desired unit.

② **CONTENTS** (Table of contents) Search for the corresponding specifications and open the corresponding assembly drawing (item ③) and the corresponding part breakdown list (item ④).

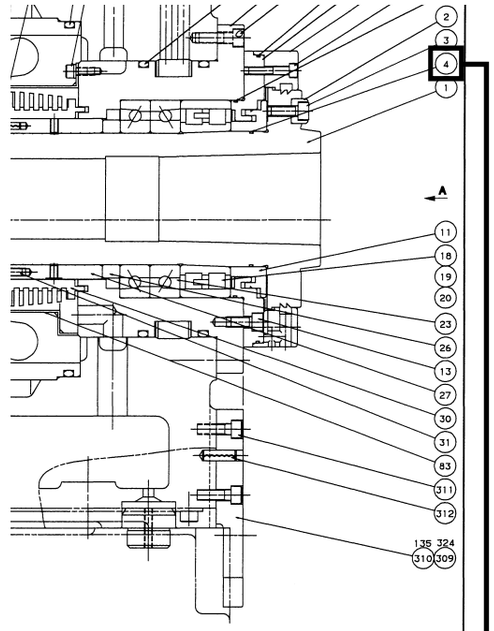
③ **Assembly Drawing** Find the "leader number" of the desired part by its shape or location.



DWG.NO. 013501A0010 01-A1

④ **Part Breakdown list** The list page of CONTENTS denotes the first page of the part breakdown list. Look for the "IND.NO." that matches the "leader number" that you confirmed in item ③. Information on the desired part is contained on the line of the same "IND.NO." as the "leader number". The circle-enclosed numeral at the intersection between the line corresponding to the part you confirmed, and the column denoted by the same alphabetic character as that shown under "SEC." of the unit you checked in item ②, denotes the actual quantity of parts used in the machine.

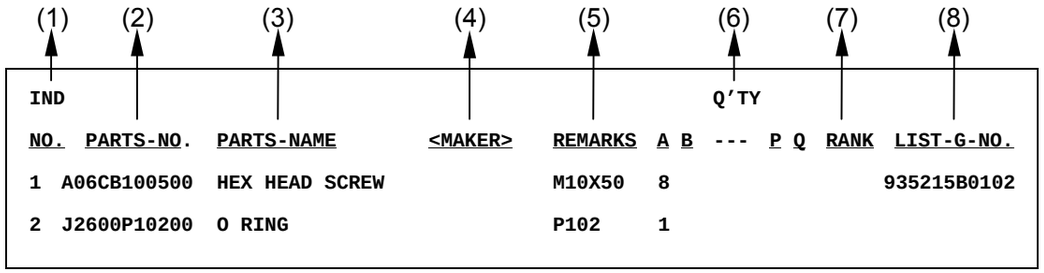
4 LIST DETAILS

List Page

Items are assigned as an index at the top of the list page as shown below.



(1) INDEX No.

This number corresponds to the leader number shown in the relevant assembly drawing. Serial index numbers beginning with 1 are assigned to units.

(2) PARTS-No.

There are two kinds of numbers (11 digits) which MAZAK defined. One is an ordinary parts number (factory assembly parts number) and the other is the purchase parts number of the venders. These parts are classified as follows.

a) Ordinary parts number (usually beginning with a numeral)
The parts number which is designed and made by MAZAK.

b) Purchase parts number (usually beginning with a letter of the alphabet)
The parts which MAZAK defined specifications for and are made by a vender.

c) Comments in a parts No. column.
The parts with index number on it, yet the parts which are not to be used for the time being or deleted parts, are indicated by NOT USED or NOT-IN-USED. "NO-NUMBER" is shown if a part number is not assigned, or "COML" is shown if the part is a purchase.

(3) PARTS NAME

Parts description which MAZAK defined. Additional word may be used to modify this parts name if it is necessary to denote, such as to identify or to show the location of installation or its purpose.

(4) MAKER

Name of the manufacturer or its abbreviation

(5) REMARKS (supplement)

Information regarding to the parts.

a) To identify parts composition. (USED WITH - - -)
Noted as above if a part is used with other parts additional parts name is preceded by above words of USED WITH.

b) Model number if the parts are purchased parts.

(6) Q'TY

The number of items used for each parts specifications.
(Example: "1" means one piece, "1st" means one set, and "1m" means one meter.)
This quantity is shown for each of 15 types of specifications from alphabetic characters A to Q (I and O not used).
Each alphabetic character corresponds to "SEC." of CONTENTS (table of contents).
Use the quantity shown in the column of the alphabetic character corresponding to the unit.

(7) RANK

Classifications according to duration of the parts, for example, "A" item has the shorter period of service life. Rank B has longer service life than A and so forth. (A, B, C or D)
With respect to the **unit-based purchase** having "U" in this column, they are listed in their ascending order in the pages having the unit code "UP".
Each purchased part is compiled in the table of contents, the corresponding assembly drawing, and the corresponding part breakdown list, in that order. For a machine equipped with a TOOL HIVE, the parts list for the TOOL HIVE is contained in a separate manual under the manual number HGMCLBXXXXE.

(8) LIST-G-No.

Parts list number applicable for the assembly drawing. (For MAZAK's internal use only.)

5 HOW TO USE THE PAGE

The page number usually consists of three sections.
The following two types are shown as typical examples below.
Page number in a unit table-of-contents

Example: 02-0-1

- Serial number beginning with 1
- "0" denotes a unit table-of-contents.
- Unit code

Page number in an assembly drawing or a list
A list (list group) is separated by either the characters "end" (end of the list group) at the right edge of the last line in the list, or the characters "END" (end of the unit).

Example: 01-A-1

- Serial number beginning with 1
- "A" denotes an assembly drawing ("L" denotes a list).
- Unit code

6 PLACING A PART ORDER

When you need parts or if you have any questions about Mazak part lists, please consult with the Mazak sales or service representative or Mazak-authorized dealer in your area.

When ordering parts, please give the following information as well:

(1) Parts number (11 digit).

(2) Parts name.

(3) Q'ty (how many).

(4) Your machine model and type.

(5) Machine serial number.

(6) Manual number of the part list that you referred to, or for a unit-based purchase, the purchased part number
Example: H135LA0041J

(7) Page No.
Example: 01-L2

Note: Please be sure to give all the above information without omissions and accurately.

7 ABBREVIATION

Following abbreviations are used in part description and indexes.

ABBREVIATION	FULL WORDS
HCD (HD)	Hydraulic circuit diagram
ACD (AD)	Air circuit diagram
CCD (CD)	Coolant circuit diagram
LCD (LD)	Lubrication circuit diagram
SCD (SD)	Spindle cooling system diagram

The following abbreviations are used in this replacement parts list for the parts names and items.

ABB'N	FULL WORDS	ABB'N	FULL WORDS
ASSY	Assembly	IDX	Index
BRKDN	Breakdown	LK	Lock
BRG	Bearing	NHA	Next Higher Assembly
COML	Commercial	Q'TY	Quantity
DWG	Drawing	SCR	Screw
EFF	Effectively	SEC	Section
HEX	Hexagon	SKT	Socket
HD	Head
